

# Differential scanning fluorimetry demo:

## Demonstration of instrument for protein stability analysis

### INTRODUCTION:

CF BIC and Specion, s.r.o. are organizing a one-day demo focused on differential scanning fluorimetry. In advance, the participants can attend an online webinar focused on the theoretical background, technical details and benefits of **measuring the protein stability** in a high-throughput plate format. Practical part will follow the next month with an opportunity to **measure their own samples** on **SUPR-DSF instrument** (Protein Stable). All specific questions will be possible to directly discuss with the company specialist.

### PROGRAM:

#### Wednesday 23<sup>th</sup> August

10:00-11:00 Webinar – theoretical introduction

#### Friday 22<sup>th</sup> September

10:00-16:00 Practical hands-on demonstration

*If you are interested in measurement of your own samples, please contact the organizers in advance.*
