

Mass Photometry Workshop: Demonstration of instrument for molecule size analysis

INTRODUCTION:

CF BIC and Specion, s.r.o. are organizing a two-day workshop focused on mass photometry. In advance, the participants can attend an online webinar focused on the theoretical background, technical details and benefits of **measuring the size of molecule and their complexes** in low volume and concentrations. Practical part will follow the next week with an opportunity to **measure their own samples** on **Refeyn Two** mass photometry system. All specific questions will be possible to directly discuss with Refeyn specialists.

PROGRAM:

Monday 2nd October

10:00-11:00 Webinar – theoretical introduction

Thursday 12th October

10:00-11:00 Method and instrument introduction

11:00-16:00 Practical hands-on

Friday 13th October

10:00-15:00 Practical hands-on

*If you are interested in measurement of your own samples,
please contact the organizers in advance.*
