

Chemiluminescence and Epifluorescence Workshop:

Demonstration of documentation system IRIS

INTRODUCTION:

CF BIC and BARIA, s.r.o. are organizing a short workshop focused on the chemiluminescence and epifluorescence imaging. The event will focus on the latest development in the field of Western blot imaging. In the practical part, the new documentation system Alliance IRIS (UVITEC) will be demonstrated with an option to test your own samples. All specific questions will be possible to directly discuss with the company specialists.

PROGRAM:

Wednesday 19th June

10:00-11:00 Method and instrument introduction

11:00-11:30 Small refreshment

11:30-13:00 Practical hands-on

If you are interested in imaging of your own samples, please contact the organizers in advance.

Please register [HERE](#).
